

## Walkthrough for Shuggerlain v.0.16

### PROLOGUE PART 1

This part is quite linear. Correct choices for the battle:

1. Everyone behind the wall
2. Let's hold them right under the gate. We will bottleneck them
3. Catapults
4. Ok, I'll handle this
5. Infantry

### PROLOGUE PART 2

In this part of the game there are no bad or good choices in the story, as it's a prologue and it's still quite linear. However we'll tell you useful information for the combats of the update.

The first one is the encounter with the lesser succubus Misha. To make sure she'll attack you in the alley, make sure to have **breakfast** both times you have that option available. Otherwise she won't appear and you'll miss the event.

After that, you only need to **have a walk at night with Dynae** to activate the event.

After Dynae leaves with the two Ashteran girls, Misha will appear. At that point select **free her** to start the combat. "Scare her" option will do exactly that and you'll miss the event.

Ok, now you're in the combat.

You have available the following attacks from the beginning (and how many damage points every action takes to her health bar):

**Kiss her:** 8 damage points

**Kiss her neck:** 7

When Misha's health drops under 90 you'll also have:

**Touch her breast:** 9

When Misha's health drops under 70 you'll also have:

**Nipples:** 9

**Stimulate Crotch:** 11

When Misha's health drops under 55 you'll also have:

**Finger her:** 9

When Misha's health drops under 40 you'll also have:

**Sex:** 16

So basically the most effective combination with Misha would be: Kiss, breast, crotch and sex

Misha will also attack you. And like you, some of her attacks will become unlocked when Nulkan's HP drops down:

**Kiss:** 6 damage points

**Kiss neck:** 5

**Handjob:** 9 (Needs Nulkan's HP under 80)

**Lick tip:** 10 (Needs Nulkan's HP under 80)

**Assjob:** 12 (Needs Nulkan's HP under 60)

**Blowjob:** 12 (Needs Nulkan's HP under 60)

**Titjob:** 12 (Needs Nulkan's HP under 60)

**Anal Sex:** 11 (Needs Nulkan's HP under 60)

With all this, you'll have the tools to beat this lynx girl and avoid other men to suffer under her charms :D

### Littanos Battle

Shuggerlain uses a combat system we called VN battles. First of all you need to understand the 3 phases in it.

**Tactic phase:** In this phase you'll have to take decisions that will affect directly to the battle.

Choose the correct option to reduce the damage taken and maximize the damage you cause.

Correct choices will also generate 50 fever points. Neutral decision 20 points. Bad ones 0 points.

**Skill Phase:** In this phase you'll be able to spend generated fever points in powerful skills. In battle, you confront bigger enemies, so the skills of your heroes are essential to make victory happen.

This phase comes always after finishing your tactical phase.

**Combat Phase:** Questions 3, 6 and 9 are Combat Phase questions. It's similar to tactic phase, but in this case you have to choose which unit will confront a specific enemy unit. For this, you'll have to take into account the strong points and weak points of your units and the enemy's.

In this battle you'll only manage infantry and light cavalry units. What you need to know for this update is that a same unit type (let's say **infantry**) **will always do a neutral damage** to their own type (it means, another **infantry**).

**Light Cavalry is good against** Ranged units, like **Mages** (they are quick to avoid combat with other soldier, they can reach fastly their target and they are agile enough to avoid the most of the projectile attacks).

In future walkthrough we'll do a more complex and comprehensive damage sheet, but for now it's not really necessary.

So basically, the best options for winning the Littanos Battle would be:

1. Command Occultations Spell
2. It's time. Charge!
3. Light Cavalry
4. Calm her down
5. Nadine! Fall back!
6. Infantry/Light Cavalry (Both cause neutral damage as there are not better units available yet.)
7. Let them escape. Focus on the remaining ones.
8. Send Nadine to charge against that flank.
9. Infantry/Light Cavalry (Both cause neutral damage as there are not better units available yet.)
10. Scream something to humiliate him.

Of course, don't forget to use the skills when you can.

With these choices Tregor's army will be way below the 3000 and you should win the battle.

Notice that all values in battles are temporary and they may change in future updates in order to balance the combat and the units.

## AFTER PROLOGUES

The beginning of the update is pretty linear. Just go ahead and after some time...you'll be fighting against Yalen's army.

### YALEN BATTLE

To win this battle just try to select the correct choices and just use 1-2 skills at max, because you need the fever points for Dynae's spell (200).  
If you spam skills in this battle, you'll lose. Also, some choices will require fever points.

1. Reposition behind the mages
2. Tortoise formation
3. Light Cavalry (Note: cavalry > ranged units)
4. Retreat for now (Note: cavalry is good against range, but they suffer in battle)
5. Keep close to araxian infantry
6. Infantry
7. Heal them
8. Knockout Phenn
9. Light Cavalry
10. Kill that bastard

After the battle you'll be able to access to the camp. Do what the game says and **visit Nadine** to congratulate her great job in battle.

Surprise! She's masturbating thinking about Nulkan. At this point you may want to save your game because you'll have to decide: **let her relieve you or go back to your tent.**

-First option will unlock a Nadine handjob scene + 30 xp points of relationship with Nadine

-Second option will unlock a Dynae blowjob scene + 30 xp points of relationship with Dynae

After that, there's no much more to do so **go to your tent and Rest.**

Next day is pretty linear, just go ahead and...be witness of the happenings.

The next day, you'll only be able to **visit Dynae's ceremony**. Do that.

After the HAPPENING, you'll talk with Dynae and among other things, she'll give you a stone of spacial convergence. This will be useful for future dates (not now).

Ok, so...you've heard Dynae. With the current situation, you'll have to start knowing better the girls of the game. You'll be able to visit Dynae (no options available with her for now), Nadine, Luth and Saraith.

**Talk** and **Ask** with them. When your level with one of these girl is 3, you'll be able to date them. On the date you'll only need to select the correct choice to trigger the H-scene. It's pretty easy, but anyway:

Nadine -> Kiss her

Luth -> Obey the voice

Saraith -> Move her away by her shoulders

There no much more to do in the camp. If you talk 3 times with your soldiers on the next battle you'll start with 50 fever points (instead of 0), but as there's no more battles yet, it has no real use in this update.

After these 3 dates, go to your tent and decide to advance to Nocverchis (next nation). Of course, this is not developed yet, but an event will trigger. After that the update finishes.

### Gifrix Battle

To trigger it, wait at least until day 7. Then, in the camp, select "**Take a walk through camp's surroundings**" when your actions points are just 1.

### Tips

Gifrix is a Nocverchan, a bat-human race. She will regenerate after any attack where she uses her mouth and gets Nulkan's fluids. These attacks are:

[You kiss her] [She kisses you] [Lick tip] [Blowjob]

You want to avoid these attacks. Well, in fact, the only thing you can avoid is **kissing her**, so at the beginning just **kiss her neck**.

Too hard? Don't worry. Gifrix has a weak point. She's very sensitive in the **nipples**. So focus on them to be sure you win. If she doesn't perform too much blowjobs or other hard attacks, you can also check other attacks just to see the animation :)
