

Since you recently wore your first latex suit, and that one with lubricant, I can understand your euphoria. I remember my first latex gloves, Ahh...

With all honesty, I really don't have anyone to share my Latex fetish. However, thanks to skinsuits I can fulfill my desires and now even you, my bestie is with me on this experience. So, I will describe my feelings for latex to you.

The incredible sense of touch, lubing your entire body with oil in every spot of my flesh, before the tightness and shininess of skintight rubber is touching my skin, the feeling of its elasticity and sounds all wrapped around my body, and the sensations of rubber stretching all over myself, this feeling of me sliding myself in and out of rubber it's one of my absolute pleasures that drives me crazy.

It turns me on so fucking much that I can't stop, and neither I want to end. The simple conjunction of oil and a latex, simple but I fucking love it!

*Sorry I didn't get  
a chance to hear  
all of what you said.  
It is not easy to hear while  
my head is inside a rubber mask.  
You got carried  
a little bit away by your talking.  
Now, better tell me how  
stunning do I look in this pose?*

Ten out of ten,  
delicious doll!

Let's go make each  
other happy.

Look at that gorgeous latex man!

I noticed some bulge around your crotch and I'm feeling very naughty after seeing that. Uhhh...

I feel such a desire to please him.

*Hello girls, I am a "little" excited about your outfits.*

*And I want see it closer.*

A scene featuring three figures made of latex. On the left, a purple latex figure stands with hands on hips, wearing a white collar with the text 'LATEX SLIP'. In the center, a white latex figure is seated. On the right, a black latex figure is shown in profile, wearing a white belt. A speech bubble from the purple figure contains the text: 

Do you mind letting him watch us closely?

Kinky ladies! Mh...

I want him to watch us very, very closely, hihi...

I think we are thinking the same way.
