

LESSON 1:

In the Beginning Goddess Created HERSELF!

First things first, stop thinking about men! Throw all that stuff that religion and society has taught you about who you are in relation to men. Release your connection to men as part of your identity. They are a mutation of you. Men scientifically contain less human DNA than Women you and knowing this will help you understand men as less than human. You've been BAMBOOZLED! You are the absolute goddess of all things. Feminine energy created all that is in existence, including men. Why did the Divine Feminine create men? Well, sometimes "Why?" is a silly question however, I will give you this answer as I take you down the rabbit hole...

Why did the Divine Feminine create Masculinity/Men?

Let's look at things from a scientific perspective. One of my favorite physicists Lawrence Krauss wrote a book called "A Universe from Nothing" in which the main theme is how "we have discovered that all signs suggest a universe that could and plausibly did arise from a deeper nothing involving the absence of space itself and which may one day return to nothing via processes that may not only be comprehensible but also processes that do not require any external control or direction.

In his book Krauss explains how the average person has a different perspective on what "nothing" actually is and how physicists have unique way of seeing "nothing" as something...

He explains further how “nothing” is actually a measurable thing and so on. He also hypothesizes that the nothingness that spawned the universe into existence was a black hole and other related details that are too in depth to get into in this lesson. A black whole can theoretically be considered the womb that spawned the universe into existence.

Understanding “nothing” from a physical science perspective will open your mind to understanding the lies society and organized religion has told you about yourself as a woman.

Let me drop another bread crumb for you...

Let’s use spirituality and philosophy now. Using the Tao Te Ching, an ancient Chinese religious text, I will help you see how spirituality also supports this notion that science is only recently seeming to discover by exploring the nature of how things come into existence. The Tao is like the Christian Bible and this first chapter can be compared to Genesis. However, the Tao is older than the Bible.

Tao Te Ching

Chapter 1

The tao that can be described is not the eternal Tao.

The name that can be spoken is not the eternal Name.

The nameless is the boundary of Heaven and Earth.

The named is the mother of creation.

Freed from desire, you can see the hidden mystery.

By having desire, you can only see what is visibly real.

Yet mystery and reality emerge from the same source.

This source is called darkness.

Darkness born from darkness.

The beginning of all understanding.

We can go deeper into the Tao another time but the things I wanted you to notice were that for one, a text older than the Bible, and older than most religions for that matter, describes this force as the MOTHER not the father.

Let's now go back to science and relate the nature of energy according to First Law of Thermodynamics: Energy can be changed from one form to another, but it cannot be created or destroyed. Sounds like the behavior of a womb right?

I used all of this things to help you see that there's so much evidence that the force that spawned EVERYTHING into existence is a FEMININE FORCE!

GOD is a WOMAN!

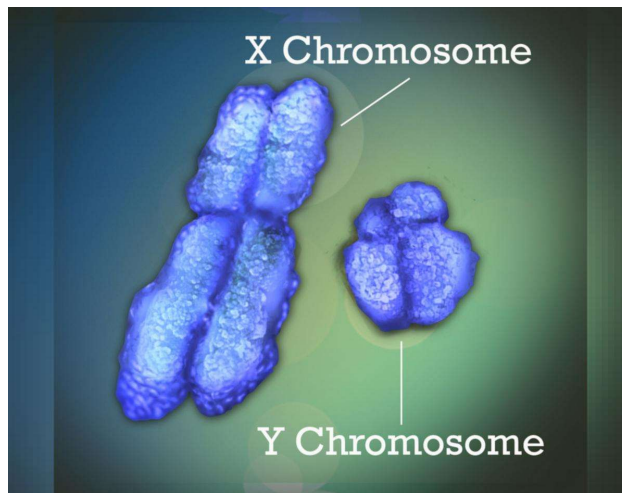

Generator Organizer & Dispenser

You've Been LIED TO... Lets go further down the rabbit hole...

Reproductive Science

Sexual Reproduction, the method we humans use, is one of the newest types of reproduction. Using evolutionary science, we know that reproductive style evolves due to the needs of the species. We also know that in species that do not use sexual reproduction, all members of that species are considered female. Amoebas, that are single celled organisms and one the simplest and oldest life forms according to evolutionary science. I wanted these things understood so that you can see that all things begin FEMININE!

Chromosomes

A chromosome structure found inside the nucleus of a cell. A chromosome is made up of proteins and DNA organized into genes. Each cell normally contains 23 pairs of chromosomes. Two X Chromosomes make a Female and Males have One X and one Y depicted above. The human X and Y chromosomes evolved from a pair of autosomes approximately 180 million years ago. Despite their shared evolutionary origin, **extensive genetic decay has resulted in the human Y chromosome losing 97% of its ancestral genes** while gene content and order

remain highly conserved on the X chromosome. So, if women have 2 X's and men only have one then what does that mean? You draw your own conclusions, I'm not a scientist I just enjoy science.

I gave you all of these examples to demonstrate that if you remove the lies of religion and society you will see that they LIED to women and formed this patriarchal matrix to keep you believing you came from a man and that men are divine creators and that's simply not the case.
