Tired	17998589746303365631	Dazed
Weirded Out	10633577503920851353	Embarrassed

2. NOTES AND FAQ

Testing the moods to see what they're like in game

Doing that is very simple. Just put in game the script file 'for Creators_testingTheMoods'. Click on the selected Sim in game and you'll find a menu called 'Mood Pack Testing'. Inside it is an interaction leading to a menu where you can choose what mood to trigger. I STRONGLY advise having UI Cheats installed to do this, this way you can just right click on any moodlet to get rid of it and test the next mood that you want to look at.

Want an environment commodity for an object?

If you want an object to have an aura carrying one of the moods in my Mood Pack, **contact me and I'll create the necessary commodity for you.** I'm not making them by default because I have no idea if there will be demand and don't want to waste the work. Do ask me if you want one! I reply to everyone. Where to contact me? [Discord](#) – [Twitter](#) – [Website support form](#) - [Patreon](#)

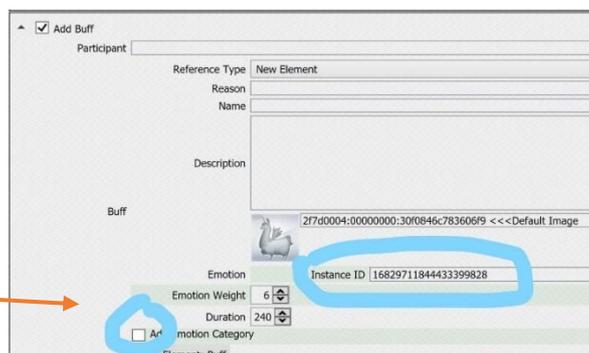

Use S4S and don't know how to use a custom mood?

It works just like with normal moods. Grab the mood tuning's ID, put it in mood_type in both the Buff tuning and its matching SimData tuning. In 'Temporary Commodity Info', you can specify categories as usual. See previous page for suggested categories matching each mood.

```
<I c="Buff" i="buff" m="buffs.buff" n="Buff_Object_CardGameWin1" s=
<V n="temporary_commodity_info" t="enabled">
<U n="enabled">
<L n="categories">
<E>Confident_Buffs</E>
</L>
<T n="max_duration">240</T>
</U>
</V>
<T n="audio_sting_on_add" p="InGame\Audio\Stings\sting_buff_gain.
<T n="audio_sting_on_remove" p="InGame\Audio\Stings\sting_buff_lc
<T n="buff_description">0xFFE80794<!--You're a regular card shark
<T n="buff_name">0xFEBA077B<!--Winner, Winner, Chicken Dinner-->
<T n="icon" p="InGame\UI\Icons\Buffs\buffs_cardgame.png">2f7d0004
<T n="mood_type">9570380053010745747</T>
<T n="mood_weight">1</T>
</I>
```

Use MC4 and don't know how to use a custom mood there?

Just copy the instance ID from the table above from the mood you want. When you create a buff, paste that in the appropriate "Emotion" window. Be sure to **UNCHECK** "add emotion category" as MC4 **cannot** do that with custom moods.

Leave this empty!
